On the Windows platform, AutoCAD and other Autodesk products have been criticized for being difficult to use, for requiring excessive computing resources, for lack of suitability for creating some types of drawings, and for high retail prices. The 2016 version of AutoCAD introduces a major revamp, removing the classic ribbon menu from the user interface. Other prominent CAD applications include MicroStation by Bentley Systems, VectorWorks by DGN, and Creo by Siemens PLM Software, all of which also offer similar functionality and tools. 1. CAD Basics 1.1 Introduction If you understand how the computer works, and are willing to learn AutoCAD's operating principles, you can use it effectively. AutoCAD's workflow is different from those of other CAD programs; AutoCAD uses a workflow paradigm, which is based on principles from the field of human factors engineering. The AutoCAD primary user interface (UI) is divided into three parts: the Viewer (also known as the AutoCAD window, or Acwin), the Properties Palette (also known as the Properties dialog box, or the Document Properties window, or the Info Bar), and the drawing area. The Viewer is where you create and edit drawings. You can customize its appearance and functionality. The Properties Palette is where you set values, such as dimensions, annotations, settings, and so on. The drawing area is where you draw your drawings. Figure 1: Viewer, Properties Palette, and drawing area You use the Viewer to select and set properties, and to view, edit, or create drawings. You use the Properties Palette to set some settings such as dimensions, annotations, and so on. You use the drawing area to make a drawing. Figure 2: Viewer, Properties Palette, and drawing area If you know the basic principles of how computers work, and understand some basic principles of human factors engineering, you can become an efficient AutoCAD user. The following sections discuss how to create drawings, how to edit drawings, and how to save, print, and export drawings. 1.2 Creating a New Drawing To create a new drawing, choose File > New Drawing, or press F9. Figure 3: Choose New Drawing The New Drawing dialog box opens. Figure 4: The New Drawing dialog box You can set the following properties for your new drawing:

Enter the license key. Click on 'Generate'. Select 'Basic' / 'Existing Files' Click on 'Create'. Put a name for the file. Click on 'Save as' and save it in your autocad folder. If your filename is already there, then you can simply click on 'Open'. If it is not already present, then choose the file and click on 'Open'. This will overwrite the previous keygen. If the license is for a few systems, then use the 'Change' tab and enter the serial number you need. Click on 'OK'. Now we are all set. I hope this helps. A Prayer of Thanksgiving Today's gospel reading is one of the oldest in the gospels. Jesus is asking the Father to help a widow, the demoniac and a blind man. There are three powerful ways in which we are invited to respond to the Master's prayers: 1. Give a portion of our wealth. In the Old Testament economy, a portion of wealth was given to the poor. In the new economy, we are to give of ourselves. We have been given all we need in Christ, and our heart, our generosity and good works are an expression of our unworthiness. 2. Do not abandon us. The Lord offers us a great deal to draw us to him. Jesus was tempted three times and won. He cannot fail. God invites us to follow him. 3. Do not let us sin. We need to do all we can to resist sin in our own lives. Jesus' life is the pattern of our own. We need to follow him. We receive a special gift this Thanksgiving season in the form of a new book on prayer from the Sisters of Mercy: "Prayer in the Mercy Tradition" is the fourth in a series of books on "Patient Hope," sponsored by the Sisters of Mercy. With a foreword by Sister Janet Mock, the book by Dr. Joseph O'Donnell of the Sacred Heart Missionaries, offers the reader a richer understanding of the actual practice of prayer as it is lived out in the community and the individual. In this book, O'Donnell describes the process of contemplation and asks the reader to reflect on the worthiness of their prayers, the intentions of the prayers, their ministry, their relationship to God and to each other. He also challenges the reader to make prayers into acts
