Players use this data to refine and enhance individual attributes and overall control. Action control is more responsive and allows players to perform tricks and drop-ins more naturally. Animations and styles are optimized and data-driven. Player movements and controls are more authentic. Additionally, a number of changes are made to the goalkeeper in FIFA 22, including the ability to read the ball better, execute trick saves and react to long-range shots more accurately. Sudden Death Changes Sudden Death changes have been made to ensure no player is caught out with the ball at the end of regular play. Should the match enter sudden death, all players gain possession of the ball and play continues with the team that has the most shots on goal at the end of normal play. If the team with the most shots on goal still has a player with the ball, the team with more shots on goal has sudden death advantage. Another change is the addition of the new "3V3" live finals after sudden death. GIFTS AND INTRODUCTION OF AERIAL AND TACKLE CAMERA Enhanced kicks, dribbles and goal kicks make the game even more physically intense. Off-ball touches are now implemented in the gameplay for the first time. Al teams have significantly improved goal kicking and are now more adept at putting in a cross. The Al is also more intelligent at intercepting long-range shots. All real-life interactions have been improved and players now gain momentum as they run. Players now lose balance, make mistakes and miss tackles with a more realistic movement. Players' reactions to receiving a pass or shot are improved as well. New Goal Kicks have also been added in FIFA 22, with a weighted crossbar and increased goal distances. Players can also kick the ball into the ceiling and target multiple objects in the goal while playing on-pitch penalties. Referee awareness is significantly improved in FIFA 22, with improved refereeing animations. Players can dropin to mistimed tackles, float and twist out of headers. Referees now freeze players for fouls during the course of a match, with penalties being awarded or not depending on the severity of the foul. A penalty will be awarded if a player commits a foul in a position where

What's new:

- FIFA 22 introduces the all-new 'Agility Rating.' Every player now has a rating for their Agility: one of a scale of nine points representing how fast a player is and how agile they are on the ball. This is a dynamic score that changes with every move a player makes on and off the ball.
- Looking for a new way to play online? New FIFA Online Seasons! Every season sees a host of new classic modes, including new Co-op Seasons, Competitive Seasons and Al Seasons, which feature new rules, new roles and new ways to earn points and success.
- League Play puts a brand new twist on the way the world of football is played. Post-match results are based on game actions, giving our fans even more control.
- The Last Man Standing mode is back in FIFA 22, allowing you to test your last-ditch tackle as a defender. Now when it's your last chance to get the ball back, you'll need the skill to intercept it. Try it at home or in your garden!
- A new Skill Stick delivers a sublime, authentic and smooth responsive ball control feel on PlayStation 4.
- With a combination of new and upgraded depth perception technology, ball manipulation changes and the introduction of 'Ball Traction,' the action on the ball moves more fluidly and realistically.
- Undercover Defences feature return, giving a break from the high-pressing, covering tactics that have dominated the game in recent years.
- The all-new FIFA Ultimate Transfer Market allows players to buy the biggest and best names in football. From experienced captains to rising stars, there's no shortage of talent to choose from.
- Analytics reflect a visible change in some unexpected areas of play, using data analysis to transform the way you play.
- Artemis is a new additional tech visual improvement aimed at polishing the player models and bringing each player's realistic likeness to life.
- When it comes to refereeing, goal-line technology has improved, with red and yellow cards shown in the direction they're moving, to make it easier to understand for the coach and the players on the pitch.
