Elden Ring is a fantasy action RPG. The game is produced by Red Lotus Games, a small indie game development studio based in Japan. The game features exhilarating online battles that fully engage you through your unique combination of weapons, skills, magic, and bravery. The game's main feature is the seamless use of an online play element which loosely connects players around the world. The online elements also contain an asynchronous story that allows players to feel the presence of other players. Players can grow powerful by linking to the NPCs of other players. Additionally, they can also learn the secrets of the game's various locations and receive information about other players in online events. Users can also use the online element to connect with other players and take part in online events, such as existing quests, as well as quests that are exclusively created by Red Lotus Games. GOOD NEWS! Red Lotus Games is glad to announce that Elden Ring will launch its Open Beta on August 28, 2018 (5PM KST). We are looking forward to hearing your feedback! Thank you.
